

Plejadisch-plejarische contact reports, conversations, block 2 ^ Neununddreissigster contact Wednesday, 3rd December, 1975, 01.37 h Billy Du has called me rather unexpectedly to this contact. I was just in falling asleep, while my woman has slept only few minutes. I am clandestine so again abgezwitchert.

Semjase

1. It is known to me.

2. Worry you, however, not, because them will sleep very firmly that she does not note your absence. Billy Aha, have you missed her one special anaesthesia?

Semjase

3. It concerns no anaesthesia, but an of course released deep sleep. Billy This Like is probably asked too much, or?

Semjase

4. It would lead too far, because we deal many other and more important things.

There is Billy Natürlich, however, what should happen now if I am not at the moment back namely a nice discussion with my dear woman. If she awakes and I do not lie any more in the feathers and also is not to be found, then it puts what.

Semjase

5. You worry free of charge.

6. She will not awake, before you back nice discussion with my dear woman. If she awakes and I do not lie any more in the feathers and also is not to be found, then it puts what.

Semjase

5. You worry free of charge.

6. She will not awake, before you are back.

7. Nevertheless, in addition, however, we have discussed that we will jump over the time. You said Billy This, besides, however, in the end, I still become an old man.

Semjase

8. It should not become the rule.

Billy Cut, well, I fears me also not before growing old. How long the excursion should last, however, then? Semjase 9. We have calculated two days for it.

You feed Billy Dann me probably again on the stuff which does not allow to sleep me or? Thus the life well starts and it lasts a little longer. It creates, so to speak, a balance for two days which I become older by this business.

Semjase

10. This is not in such a way, because we have procured earthly food for you.

11. Otherwise, you would remain awake too long.

Billy Das heisst that I must book two days with a sleeping deficiency? Semjase 12. Certainly, but the such you are used to you.

You say Billy This very easily, in the end, I become not younger. Then I am determined again missed by oversleeping like a tramp herumwandeln. Now well what should happen now?

2

Plejadisch-plejarische contact reports, conversations, block 2 Semjase

13. Only I would like to make you with this new device close. Billy This is again such a grid device for taking photos? Semjase 14. Certainly, I let it to Askets make information.

15. It will be to you a better help than the first device.

Billy Hoffen we this, but by the way ascetic; she is still guilty to me the transmission. You already know, that which I have moved or have lost. When can she give to me this?

Semjase

16. This will occur at the beginning of the next year.

Then there is Billy Aha, again much work. In the last time it was stagnant a little bit. Also Arahata has not announced itself.

Semjase

17. You know that I am occupied at the moment otherwise very much.

18. On the other hand, however, your forces became by us, Arahata Athersata and Petale so much taken up that we must award rest you.

You do Billy Jetzt me, however laugh. I may already endure something. Semjase 19. I do not doubt this, however, you should not have to exhaust your last reserves.

20. It is enough that you have given long years more and more and have demanded of yourself than everything was good for you.

21. Often you have done with your forces overexploitation and have worn yourself out more than only.

22. Another Erdenmen <=rh war\* A\*r\*n----^-----1 t \*\* «. \*a\* i ~ - Billy Jetzt you do me, however laugh. I may already endure something. Semjase 19. I do not doubt this, however, you should not have to exhaust your last reserves.

20. It is enough that you have given long years more and more and have demanded of yourself than everything was good for you.

21. Often you have done with your forces overexploitation and have worn yourself out more than only.

22. Another earth person would have broken in it and would have lost his life.

Nevertheless, Billy Man must do, in the end, something for his task. Besides, the soft man helps to play nothing. Hence, I do not understand your sentimental outbreak.

Semjase

23. Now you are more important than ever, because you still have to perform a lot of work.

24. However, this should be divided according to your forces, thus you pass to no exhaustion.

25. This deals nothing with sentimentality.

Billy Du brings me really to the grin. I am really no weakling. Semjase 26. Certainly, this nobody may also say of you - you are very often only too hard to yourself.

27. And exactly therefore you must leave it already to us how much work we can charge with you.

28. Hence, I also know that you have expressed yourself always only from the doubt that you could not fulfil your task with regard to the work imposed to you thoughtfully because you extremely exactly always want to do everything.

29. However, we have never encumbered you any more than possible seemed to us, even if we thereby had to take up very much your forces.

30. Now, however, you really need some rest to be able to recover you.

31. We are able to judge this really better.

I must dance Billy Dann probably after the music which is played to me.

Semjase

Plejadisch-plejarische contact reports, conversations, block 2 3

33. Now, however, troubles you first of all around the new device.

34. In the meantime, I bring my ship in the space.

(Semjase pulls her ship high above the earth, and I deal with the new grid device for taking photos.) Billy Ich has understood the thing.

Semjase

35. This might not have been difficult to you.

Billy Nein. How does it stand now, however, with the dimension gate in the devil's triangle? Can one see this? Semjase 36. With the eyes only it is not recognizable, however, it is possible to make the radiation visible. Billy Du means, that...

Semjase

37. Certainly, I am able to make from my ship the radiation visible.

38. Only two radiation roads from this earth side are present, however, recognizably, while is third behind the earth and, hence, from here cannot be seen.

Billy Dann fiddles about sometimes with your devices - can I also take a photo of this then?

Semjase

39. Certainly, however, you will see a lot of things more than you now is ordinarily able to recognise. Billy Sehe I then on a screen?

Semjase

39. Certainly, however, you will see a lot of things more than you now is ordinarily able to recognise. Billy Sehe I then on a screen?

Semjase

40. No, you like it by the view windows to recognise, because the Sichtbarmachung of the radiation occurs through a ray screen which is spread from the whole ship.

41. Pay attention now exactly to the earth...

Billy - girl... this is fantastic. - I really see two immense ray roads. Besides, however, are all

around the earth still many balls and other things what then do these signify?

Semjase

42. These are energy concentrations of the most different kinds and strengths.

43. They circle the earth in irregular distances and intervals, nevertheless, are very important for the existence skill of the earthly life forms.

44. Any more I may not explain in addition.

Then I do Billy Auch well, fast a photo. - So, now this I would have, what? Semjase 45. We must still wait some time. Billy Worauf then?

Semjase

46. On father, because you know that we could not return without his ship any more in this time.

Billy Natürlich, you said this before, but how long does this last then?

4 Plejadisch-plejarische contact reports, conversations, block 2 Semjase

47. I do not know exactly, however, it will last even longer time. I can unpack Billy Dann my artillery.

Semjase

48. You have brought your weapons?

Billy Natürlich what you think then? If such saurians want to say to me good afternoon, I must be able to greet him, nevertheless, decently if his greeting a little should be coarse.

Semjase

49. Certainly, but you have a little bit peculiar humor.

50. It is quite good that you have armed yourself, because with your weapons you know to handle surely better than with ours.

51. It is good that you have brought them.

52., but I simply do not understand, why you generally feel no fear, because such animals can be surely angry.

We will see Billy This. I will try, in any case to fondle the chin thus to a dear little animal. Semjase

53. I cannot permit this.

Billy Du will already see, because I am rather cheeky. I will ask you does not predestine, because if I am already your guest, simply does not signify still long, that I...

Semjase

54. You may be maybe right.

55. Their earth person still have certain qualities which are not own to our race any more.

-----' " " bLlnTrTT^leSs^CrTCinTacn...

Semjase

54. You may be maybe right.

55. Their earth person still have certain qualities which are not own to our race any more. You mean Billy Welche Eigenschaften with it?

Semjase

56. You call the adventurousness.

Billy Ich was always an adventurous guy. Semjase 57. You really have a special kind.

Billy This is possible. Now, however, I have the question to you what is, actually, with both drawings which you have promised to me with regard to the Zeta Reticuli intelligence?

Semjase

58. Unfortunately, I could not make to you this.

59. The permission to it was not given to me.

60. I have acted a little bit rash with my assent.

Billy This is not further bad, something like that can already seem. May one ask, however, maybe why?

Semjase

61. To be able to make correctly the pictures, I would have had to draw certain details from which for the earthly scientists knowledge would have succeeded which they may not attain yet.

Plejadisch-plejarische contact reports, conversations, block 2 5 Billy Ich understands. But if we are already with the drawing; it would interest me once how <dear God> looks real or has looked.

Semjase

62. Of which do you think?

Billy An the big JHWH who wanders like a ghost still today by the Christian religion.

Semjase

63. There two are of those.

Billy Zwei?

Semjase

64. Certainly.

I do not understand Billy This. Semjase 65. Why do you speak the untruthfulness? Billy He?

Semjase

66. You know the relations very exactly.

Billy Nun well if you know about that! I mean old <dear God>: JHWH the barbarian, how:ch him has christened, or Mr. Jehovah, as he was called general. uu. lju ivciiüluic vci i iaiu exactly.

Billy Nun well if you know about that! I mean old <dear God>: JHWH the barbarian, as I have christened him, or Mr. Jehovah, as he was called general.

Semjase

67. So the old-temporal or Moseszeitliche.

I mean Billy Genau, the superhero, the ambivalent subject which proclaimed on the one hand itself as a creation and spoke grosssprecherisch of all-embracing love, mercy and justice which demanded without hesitation innocent human blood and at his order millions-wise earth people, however, in the Handkehrum again brutally Hess slaughter.

Semjase

68. This is a very precise statement.

69. His picture is known to me very well.

70. You call him the biblical God, with us, however, he is called the unfair and cruel.

71. He found his end roughly 2150 years ago.

72. It was a very evil and power-hungry life form which led his regiment together with another and good JHWH and did uncountable earth people in death and downfall...

Billy ... and the tribute still infernal the today's Christianity gives.

Semjase

73. Certainly, unfortunately, is in such a way, because his evil influence was prodigious.

Billy This is known to me. How would it be now, however, if you to me these Superheini once still draw würdest-hast you my paper and the pencils?

Semjase

74. Certainly, however, you speak very disparagingly of Jehovah.

6

Plejadisch-plejarische contact reports, conversations, block 2 Billy Soll I to him then still honour prove? Nevertheless, in the end, he is responsible mostly at the fact that we live on the earth in the insanity of his ritual religion and that millions of earth people became because of him innocently hingemordet. Should I heap still praise then just for it on this Heini?

Semjase

75. You should not do this, because he was angry and criminally.

76. Only a distant descendant was fair.

77. I wanted to hear only how you position yourself to him.

Billy Schon well, however, you know my opinion. Your question was pointless. Already Jmmanuel has never spoken only of the God present at his time as well as of former gods, however, however, from JHWH to the barbarian...

Semjase

78... to the unfair or cruel.

Then I call Billy Meinewegen, the guy just after your namings. However, can you draw to me the Fritzen now? Does the time reach on top of that?

Semjase

79. Certainly.

Then I have a look at Billy Gut, once your ship a little more exactly if you have nothing against it? If the thing zooms off, you must just interrupt the drawing and bring the mill again on course.

Semjase

80. You have planned for something?

Billy Genau, I always wanted to see sometimes whether I can cruise about such a thing myself. I have you 79. Certainly.

Then I have a look at Billy Gut, once your ship a little more exactly if you have nothing against it? If the thing zooms off, you must just interrupt the drawing and bring the mill again on course.

Semjase

80. You have planned for something?

Billy Genau, I always wanted to see sometimes whether I can cruise about such a thing myself. I have always exactly observed you and now know somewhat about the control and the initial start-up of the impulse. If you have nothing against it, I play about once a little bit with it.

Semjase

81. You are really good, you mean your words really seriously. Billy Hast you then believed that I joke?

Semjase

82. I have really accepted this.

Then you know Billy Nun well, now about that it is no fun. Lay now quietly loose with the drawing, I become only the earth several times umkurven, thus - you see, the mill already zooms off, thus, yet a little bit more steam and them...

Semjase

83. Arimo, arimo...

You mean Billy Was? Semjase

84. Just I have said, just, just...

I have not understood Billy This - thus, the mill stands what is wrong then?

Plejadisch-plejarische contact reports, conversations, block 2 7

Semjase

85. Excuse, of course you could not understand me, I have got excited and, hence, have spoken in my mother tongue.

Billy Aha, Arimo is called stop.

Semjase

86. No, it signifies hold, this is a difference.

You have Billy Aber what then? Do you have what against it if I bring the box sometimes decently on tours or she allows to generally cruise about? You could have said this, nevertheless, immediately.

Semjase

87. I have to argue nothing against it, because I know for a long time that you have tried to be able to fly once the ship.

88. And I also know exactly that you are able to do this.

89. However, you have paid attention just now to the speed?

Billy Natürlich, there were just 290,000 kilometres per hour; further I did not want the mill auswinden, because of the time and in such a way. Nevertheless, you said yourself that it is very dangerous if one crosses with the normal impulse or generally simply the speed of light without diving, besides, in the hyperspace.

Semjase

90. Certainly - have you really remembered? To Billy Sollte I you lie then?

90. Certainly - have you really remembered? To Billy Sollte I you lie then? Semjase

91. This would be to me a little bit completely stranger in you.-

92. Excuse, I have got excited needlessly.

93. It was to me, as if you had not considered the facts with regard to the speed.

94. However, this is not obvious in such a way as you say.

95. You can steer my ship quietly if you want.

96. Pay attention, however, please here; should you lose the control, then simply press these three contact points in the grids.

97. By them everything switches in zero position and the automatic adjusts everything in seconds, thus no dangers can appear.

98. Pay attention, however, in spite of all please to the speed.

Billy Gemacht, girl. Have none Anxious. Now Semjase 99-th property, then I devote myself to the drawing. Billy This is nice, then I also want sometimes.

Semjase

100. Follow, however, please my instruction.

Nevertheless, Billy Natürlich, does not provide you constantly. I do not act definitely frivolously. Semjase 101. I will never probably understand your kind, but her earth person are everything a little bit peculiarly in this form. Billy Du means because of the adventurousness and thus?

8

Plejadisch-plejarische contact reports, conversations, block 2 Semjase

102. Certainly, she is a little bit completely stranger for me.

Billy Wir Erdenwürmer are level in spite of all one more kind of old broadswords - at least some of us. The stranger simply lures us, and the harder to us the life begins, all the more we can take pleasure in it. I will already teach you this, maybe if we shake the paw to saurians.

Semjase

103. The reason may preserve me from it.

You must just switch off Billy Siehst you, exactly them, because she restrains everything in such things because she generates fear. The reason says to you that saurians are bad cattle who says mind, however, that the little animal plays up certainly only if it feels irritated. If we shake rather peacefully the paw, hence, it starts to be glad, but not to rotate.

Semjase

104. I do not understand your humor. Billy Meine Worte are meant seriously.

Semjase

105.???

Billy Sieh sometimes; nevertheless, your reason also means to you, or said to you that I was able to do your mill about the speed of light hochdrehen, which is why you have also got excited. After my explanation, however, you have calmed down because your mind has taught you, by my explanation that you need to be not afraid because I have really taken into consideration fear giving factor to you. | is called that you must see the facts just how they are real. Besides, of course one can be also mistaken once, then the salad is simply baked and everything is in the vinegar. In addition, what Billy Sieh sometimes; nevertheless, your reason also means to you, or said to you that I was able to do your mill about the speed of light hochdrehen, which is why you have also got excited. After my explanation, however, you have calmed down because your mind has taught you, by my explanation that you need to be not afraid because I have really taken into consideration fear giving factor to you. That is so that you must see the facts just how they are real. Besides, of course one can be also mistaken once, then the salad is simply baked and everything is in the vinegar. In addition what are already 290,000 kilometres per hour, because this is only just a splosh compared with the speed of light which amounts to about 300000 second kilometres.

Semjase

106. You say this so easily, but I cannot arrange to you the logic in it.

107. Maybe I can be led really too much by the reason in certain things without taking into consideration the interests according to mind, besides, in right measure.

Billy Bestimmt, however, these profundities have not grown also on my dung. Sfath has already taught them me since when I was to one more boy.

Semjase

108. Nevertheless, you are developed in it and in their observance as me.

109. It might probably lie with our high development that we have differently taken in such interests.

110. With certainty our a little finer dimension also exercises a certain influence on it.

111. I will have to talk once to the Meinigen about that, because I believe that a different creation in these things of use was for us.

Billy So, thus, you believe suddenly.

Semjase

112. You split my words.

113. You know the sense very exactly.

Billy Natürlich, I have only been surprised that you have already got involved so much in our speech way. On the other hand, it also surprises me, why you speak suddenly so openly of your finer dimension, because you yourself have prohibited me this, nevertheless, up to now.

Plejadisch-plejarische contact reports, conversations, block 2 9

Semjase

114. My explanation still gives no closer clues.

Billy This tunes, we leave this. If we continue; you sign, and I try to process the mill to scrap metal.

Semjase

115. If you leave the earth, besides, from the play... Billy He?

Semjase

116. Hahahaha-hahahaha.

Billy Ah, I understand, you switch very fast. However, I am glad tremendously that you take care of the kind of us to sorry mortals.

Semjase

117. It is much lighter than I have accepted...

Now, however, we want Billy Gut, really...

(It lasts 16 minutes, before Semjase is ready with her drawing and cruises about during the time I wildly by the ship, unfortunately, only around the earth and the moon around which is always something in the way to me.) Semjase

118. Here you have your Jehovah JHWH.

Billy This is hip <; pr ^riP7ialhplrl frounrlli/-h cioht rlor Fri-Hra n; ^U.4-rr ^^ Aa-mcdem bcniirr nerumKurve, ieiuier mui around uic oue unu ucn munu neium, uer to me always something is away in.) Semjase

118. Here you have your Jehovah JHWH.

Billy This is this special hero, looks friendly of the Fritze not exactly. Semjase 119. This has his correctness.

Billy Es was probably the best solution that he was set down by force.

Semjase

120. Certainly.

Billy Wenn the time still passes, if I still had some questions. Semjase 121-st question only, time is still available to us enough.

Some things which you have transmitted to me in the last contact occupy Billy Gut, me. In central issue it concerns once the Kontaktler. You have called to me of those 21. For other three you said that you might not speak for certain reasons yet about them, in such a way...

Semjase

122. are to be cleared ... because only still different facts.

However, Billy Schön and well, to me does not make sense, that only this 21 resp. 24 should be the only ones which really had contact with extraterrestrial or have.

Semjase

123. Nevertheless, I explained to you that I called to you only that which are not from very big meaning.

Plejadisch-plejarische contact reports, conversations, block 2 11

124. Together with them, however, are still some other earth people who had with extraterrestrial contact and still have.

125. However, their meaning is still less important and I appeal to a moderation of the problems.

126. With it, however, you may not understand that no meaning may be attached to them, because this is not really in such a way.

127. Also they form a part of the whole, however, only in much smaller form than to you with name Called ones.

128. In addition, are still scientists, authors and film-makers whom one must call Kontaktler because they are influenced impulse-telepathic by us and other to be useful to the progress and the clarification.

Billy Aha, which signified that under few true one officially known Kontaktlem, nevertheless, still at least some are which one must call real contacts.

Semjase

129. Certainly, these are theirs even many after your concepts, however, they are not from very big meaning, like from me in particular called by which certain things had to be done and be invented or which served the clarification concerning the existence of extraterrestrial human life or should serve what not always was, unfortunately, the case and is.

Finally, Billy This is a little clearer once. Your speech says that we may understand your

statements with regard to less contacts not in such a way, that just only 21 resp. 24 of you called are real.

Semjase

130. Certainly, these are even several other nevertheless not officially known contacts, more exactly said some thousands her meaning is only very low.

131. From a little bigger meaning 24 are only of those and you are not called, however, yet, because you hold an extremely big task and responsibility by own regulation, and you are

Semjase

130. Certainly, these are even several other nevertheless not officially known contacts, more exactly said some thousands her meaning is only very low.

131. From a little bigger meaning 24 are only of those and you are not called, however, yet, because you hold an extremely big task and responsibility by own regulation, and it are also the only one which has physical and fully deliberate contact with us.

Nevertheless, Billy Es is real to the Verrücktwerden with you, you cannot be more exact then a little. Must you do then only always only partial data? In this way we can reach to wrong views.

Semjase

132. This never lay in my sense.

Billy Ich knows, you thought fine that we could become clever from your information ourselves and make sense everything. However, to him was not real in such a way.

Semjase

133. I am sorry this very much.

134. Unfortunately, often I have very big trouble to adapt myself in your mental step.

135. However, Künftighin I want to try increasingly to avoid misunderstandings.

136. Hence, I would like to call to you the data with regard to the contacts again to eliminate all misunderstandings:

137. Earthly contacts of not very big meaning are of those 21 which I have called to you notable.

138. However, Danebst are another three other important persons whose name I might not announce to you yet.

139. Together with these you are to be called as the most important factor by all because you have to fulfil the mission of the Überbringung of the mind apprenticeship, which is why you were also already prepared since the earliest childhood in for your Propheten-tum.

140. In the other one exist some more than 17000 earth people who, to themselves absolutely unconsciously, with extraterrestrial intelligence impulse-telepathic in connection stand.

12

Plejadisch-plejarische contact reports, conversations, block 2 141. From these some are Thousand which are known in smaller or bigger circles and groups for the fact that they state from acceptances, however, of that are not sure to stand with extraterrestrial life forms in contact or to have stood.

142. Nevertheless, these are not known world-publicly, but only in private circles.

143. Further are to be called beside these still different thousands of persons, have become known world-publicly for the fact that they have come by observations of aircraft of extraterrestrial life forms to view contact and can still partially continue such contacts because they are attentive sky observers.

144. These in particular non-called live to too many thousands in the lands Germany, Austria, Poland, Russia, China, Australia, New Zealand, America, South America, Spain, France, Italy and in Switzerland etc.

145. However, such view contacts are also to be found in all other lands of the earth, namely without every exception.

146. However, from these thousands publicly to known Sichtkontaktlern are not only 173 which have attained a little bigger meaning in the relation on a Publikwerden.

147. However, are excluded from it all that which stand with the Gizeh intelligence in community.

148. We do not count this to the honest Kontaktlern.

Now, however, Billy Mensch, girl, this looks a little bit different than we have accepted up to now in general. Therefore, many from belong in spite of all in books and newspapers etc. to called to the real Kontaktlern. This gives to all something else picture, because we did not know that you also name people as a Kontaktler who had just sightings concerning ray ships and have.

Semjase

149. I am sorry very much if I have delivered my information unclearly.

Billy Schon well, Semjase, it is wirJJch also our guilt, we sometimes simply think not enough far.

Semjase

149. I am sorry very much if I have delivered my information unclearly.

Billy Schon well, Semjase, it is real also our guilt, we sometimes simply think not enough far. It would have probably been better if I had taken care once of all names of UFO-Kontaktlern to question you then in hand of the names after her genuineness. In particular you have said to me that Adam's ski was no Kontaktler, thus also not Michalek and the South African Elisabeth Klarer. However, recently one more name has come to me to hearing, a certain Menkger or Menger or so similarly. How does it stand then with this?

Semjase

150. Menger - he is no Kontaktler.

151. His statements and statements correspond to an imagination product deliberate to him.

Billy This is clear and clear. May I bring to you once a list from all names which I can bring in experience?

Semjase

152. Certainly, I will call to you afterwards the real contacts.

Billy Danke, Semjase, this will be very valuable for us. Now, however, nevertheless, I would be grateful to you if you called the precise data of the contacts to me, numerical I think, with the degree of her meaning. Is this possible to you?

Semjase

153. Certainly, nevertheless, you have received these data from my father already at former time.

Billy Ich knows, however, I would like to have them a little more in detail with closer information, finally, thus we have certainly clearness.

Semjase

154. As you want.

Plejadisch-plejarische contact reports, conversations, block 2 13 155. Since your discussion with my father the number of the contacts has risen around some.

156. At that time these were 17422 earth people, while today the number 17718 is to be called.

157. So...

Billy Du has really fantastic concepts in your measuring way. The increase amounts nearly to 300 people, and you speak of these of some!

Semjase

158. Nevertheless, it is only one more of 296. Billy Natürlich, but really only? Semjase 159. I do not understand you.

Billy Du is really good, because 296 people more is, nevertheless, a quite quick number.

Nevertheless, there one cannot really speak any more only of few. Call to me now, however, please tables-bulky your information and say also to me how many earth people have already seen UFOs if you know these data.

Semjase

160. Darüberführen wir keine control more, because them has become too extensive from unimportance and.

161. Hence, I cannot give precise information to you.

162. The number of the observers resp. of the Sichtkontaktler might already approach the first milliard border. Billy Woommm - this is nearly a third of the humanity.

Semjase

163. Certainly, however, only a small part of this mass accepts the reality of the sighted objects.

^CA Arhfp min = .Kor \*flin "A ~~, k" ~.

Billy Woommm - this is nearly a third of the humanity.

Semjase

163. Certainly, however, only a small part of this mass accepts the reality of the sighted objects.

164. Pay attention now, however, of my precise information:

165. 17718 earth people stand at the moment with extraterrestrial life forms of the most different kinds in impulse-telepathic connection - to them, nevertheless, absolutely unconsciously.

166. 392 earth people had 9 B.C. forcible or purely accidental unique contacts with extraterrestrial

life forms since the year.

167. These contacts are from no meaning, because they were connected with no tasks.

168. Only very much few exceptions which 31, are resp. were of a low importance in the public life.

169. 173 17 718 contacts have a half-important meaning in fulfilment of certain tasks in the relation of the clarification concerning her sightings.

170. A small number of these 173 earth people was and is known world-publicly as a Sichtkontaktler.

171. 24 17 718 contacts had a bigger meaning in fulfilment of certain tasks.

172. A few were known by these 24, however, only very much as contacts and everything of them is already divorced from your world.

173. 1 of 17 718 contacts is of sole extreme importance in fulfilment of a Prophetentums.

174. 723 earth people are contacts of the Gizeh intelligence.

175. However, these are not counted to the honest contacts.

176. 27 of these 723 Gizeh contacts have stepped worldwide to the general public.

177. Presently 36 earth people are called deceitful-wise UFO contacts, although they never had to register contacts.

178. 7 of these 36 deceitful earth people have become known with her deceitful reports worldwide as very important <contacts>.

29 of these 36 deceitful earth people have become known with her deceitful reports likewise worldwide, however, with much lower meaning than seven first ones.

178.

14

Plejadisch-plejarische contact reports, conversations, block 2 180. This is the most precise information which I can call to you at the moment and which correspond to the present state.

Billy Damit I am very contented, because now this information is really extremely clear. However, in similar connection would interest me now how it behaves with the Jenseitskontaktlern and receivers of messages from the highest levels. Nevertheless, you said earlier once that of those real even very much a few are.

Semjase

181. Certainly, this is in such a way.

182. However, besides, I spoke of only really high levels and the highest intelligence.

183. Earthly contacts are not to be found who maintain contact with higher or low or same-directed Jenseitswesen.

184. The number of those, however, which could really step with people of other dimensions in connection are countable with only of those 16 on the whole earth, however, these do not use her abilities.

Billy This is a precise number, however how can you call this?

Semjase

185. It is this for us a requirement to know these interests, thus we must investigate them.

Then Billy Wie gross is the number of those earth people who want to get in contact with niederen Geistformem and <Jenseitigen> etc. and try this, although this is impossible?

Semjase

186. To investigate this is impossible for us, however, on the other hand, it is not also of importance for us.

187. of meaning are for us only that which too differently dimensioned human forms could have connection.

186. To investigate this is impossible for us, however, on the other hand, it is not also of importance for us.

187. of meaning are for us only that which too differently dimensioned human forms could have connection.

Billy Kannst you, however, nevertheless, an approximate number call? Semjase 188. This is not possible to me, however, however, it concerns many millions.

189. However, these arrogant connections are absolutely worthless and without any meaning.

190. From value only the called 16, together with 268 connections are in the earth-human WIR-Kollektiv-Unterbewusstseins-Ebene.

191. However, these data are rather unsteady, because they rise or sink nearly daily.

192. By deaths and new phenomena.

193. With regard to 16 it was still few months ago in such a way that only of those very much a few were which could be counted in a hand.

194. These are not only the deaths which make these figures tottery, because a very big influence on it is also exercised by fluctuating radiations and consciousness movements.

I should understand Billy Was by the we subconsciousness level?

Semjase

195. These are of these subconsciousness connections with the we-form of the earth people and with it to same-dimensioned life forms in the diesseitigen area, which stand higher in her evolution in no way are able to provide than the connection for looking earth people, thus them no translated or higher knowledge or to be attained (= collective subconsciousness).

Billy Also no higher life forms which dispose of an enormously high consciousness or mind knowledge?

Semjase

196. You have very exactly grasped it.

Plejadisch-plejarische contact reports, conversations, block 2 15

197. It concerns with these forms those which are carried away to the average earth person in no way in many years in the future, because in this case the group form we is based on the subconsciousness form we of the existing earth humanity.

Billy Demnach, nevertheless, in certain sense valuably?

Semjase

198. Certainly, however, against it the millionfold pointless attempts are even dangerous for connections with jenseitigen forms nonsense and absolutely pointlessly and partially, because they of such pursuing prosecute in still very low consciousness and knowledge levels and are from still very low intelligence.

Billy Wenn I properly understand, is this special we subconsciousness level also responsible for the fact that religious crazy apprenticeships are returned?

Semjase

199. You properly think.

200. Often, however, this must be also said, these connections are only pretended or deceitful even consciously and nonexistent.

Billy This leads again too far, maybe one would have to write about that once a whole book. But how long does it still go, until we can get cracking?

Semjase

201. You must be patient a little bit, my father is very a long way off.

202. He will be only at about thirty minutes here.

Billy Hm, then we can talk something else. I have questions enough on camp. One is to me only not completely geheuer with this trip, the time since. Now I am quite about two hours from at home wee. and another two other Jaee, I have to go weflroleihpn I understand dahei einfah not ^U'I. ÜtrmnSSnnrr^noT^civvai gcuuTu^rrTTTTcIM Vdlbl lbl belli whom away.

202. He will be only at about thirty minutes here.

Billy Hm, then we can talk something else. I have questions enough on camp. One is to me only not completely geheuer with this trip, the time since. Now I am away quite about two hours from at home, and another two other days I should stay away. Besides, I simply do not understand that one should not note my absence. This is something which simply does not make sense to me.

These time movements quite simply go out my <spiritual> horizon. These little time cramps make me really not cleverer. I understand what really passes how, however, everything hangs together, this is to me a sevenfold riddle.

Semjase

203. Accept my consolation, because me do not understand more than you.

204. Even our best scientists know only few secrets of these interests.

205. They probably know this Like, When and Where etc., however, they do not know the basic causes of the process.

206. Do not think, hence, about it overmuch, because it would be pointless.

207. However, I can explain to you what happens to be able to have you two days with us.

208. This is it for us the easiest possibility.

209. It will be two days with us, while on the earth only two hours will pass.

210. However, these two hours are only the time which you have needed to come to the contact place, to reach here with me and then to go home again.

211. It...

Nevertheless, Billy Aber these two hours are crossed already around, and even more than about 40 minutes. Semjase 212. Certainly, this I just wanted to explain to you.

213. Your way from your house to the contact place, our greeting and the flight here lasted only 45 minutes.

214. This time you will also need for the return.

215. What you, besides, do not know this is that I have jumped on the flight from the earth here about two days in the past.

16

Plejadisch-plejarische contact reports, conversations, block 2 216. You know how light this is.

217. Daheral...

Now I understand Billy Mädchen, I... Semjase 218. You do not understand, because we have done no normal past jump.

219. It is a time movement which is still unknown to you.

220. Now you live since twice, namely once here and once there below on the earth. I do not understand Billy This now really.

Semjase

221. Understand, nevertheless:

222. Quite presently we live here, are at the same time, however, two days in the past.

223. Now for us is probably Wednesday, however, now on the earth is only Monday.

Billy Ich really does not understand. Now after your assertion I would have to be there below on the earth and go just to bed, because on Monday I have gone since only about morning to bed. Because we now, however, Monday have on the earth as you say, however, I am here and do not rise in the bed. This is not clear.

Semjase

224. You understand everything very well, you only do not want to accept it because you find it too fantastic.

Billy Gut, well, you state that I am here in my normal present and at the same time two days in the past. I have already lived these two past days on the earth below - have seen after my Gegenwartigkeit. Because I am restored now, however, two days, I should only start to live there below these two days resp. they live through, while I will still only live through in reality these two days with you. Nevertheless, this is crazy. After your assertion I would have to go jetzt really twice evktiprpn nümii/!. a~a--a ~\* h, a "." ^ j « b n^aa Rott aohp and Billy Gut, well, you state that I am here in my normal present and at the same time two days in the past. I have already lived these two past days on the earth below - have seen after my Gegenwartigkeit. Because I am restored now, however, two days, I should only start to live there below these two days resp. they live through, while I will still only live through in reality these two days with you. Nevertheless, this is crazy. Now after your assertion I would have to exist really twice, namely below on the earth where I go just to bed, and once here. I could visit myself there below now, hey?

Semjase

225. Certainly if we returned now to the earth, you could speak theoretically or practically, according to case, with yourself.

Billy Aha, I could go to my own Haustüre and hit din, until to me the Türe would be opened. And who would open to me, hey? I to myself in own person. Person, girl, the stupid face of myself would like to see I once if I stand suddenly before myself and say to myself good afternoon.

Besides, it only does not make sense to me that in the standard time only two hours pass, while the past needs in addition two days?

Semjase

226. This is adjusted by a time manipulation.

Billy Ich understands, one of these damned relativity theories which are no more theories for you. Hear only on me, girl, let these explanations be, because I am too stupid to understand them. To me the skull smokes so already.

Semjase

227. How do you want, maybe, however, you want to visit yourself, nevertheless, once in the past?

Billy This I only still want to consider, although it irritates me to see my own stupid face before me and to speak once with myself. However, a question burns to me for a long time on the tongue, only I have forgotten them over and over again: I know about ascetic and you that 91% of the extraterrestrial, Plejadisch-plejarische visit contact reports, conversations, block 2 17 this the earth, purely human human life forms are, even if with certain divergences of our appearance. By ascetic I have seen outside and far away of the earth also different such intelligence; those which were rather huge in the growth and reached more than 4.5 metres, while the smallest right dwarfs and brief were 40 cm . However, everything was they really recognizable human forms. Some looked like yeti, other like Cyclopes, Miniaturgoliath etc. However, two forms which I have also not seen on the earth were absolutely different, both were more animal than humanely. These were two forms which belong to remaining 9% and are unhuman human beings nevertheless nevertheless. Now my question passes whether you can make to me maybe once a picture list by the suitable forms of all these beings which visit the earth or have visited up to now.

Semjase

228. This is right, because also they are in spite of her more brutal appearance and her Unhumanität human beings.

To make 229-th drawings, however, will not be necessary, because in the next time you will otherwise reach in the possession of such an installation.

Of 230-th banality she will not be entire, for the rest, however, I will maybe be allowed to try to transmit to you picture drawings of remaining life forms.

231. However, moreover you must be patient a little bit and I cannot say, however whether I may make permissible-wise such drawings.

Billy This is fine, then I leave you the remaining paper and the pencils here.

Semjase

232. This is not necessary, because I will transmit the drawing forms directly to you and lead to you while making the hand if I am allowed.

I should draw Billy Dann them?

232. This is not necessary, because I will transmit the drawing forms directly to you and lead to you while making the hand if I am allowed.

I should draw Billy Dann them?

Semjase

233. This is not quite right; then it are, so to speak, only the executive tools. Billy Aha, possibly thus or as with Petale?

Semjase

234. Certainly, it is the same form.

Billy Dann will already fold it. I have in it already experience. But where from should I receive then the list which you have mentioned?

Semjase

235. You will find out this early enough, I would not like to speak about that.

236. Everything will be a big and very good surprise for you.

237. Nevertheless, I have said to you before some time that you have now many important contacts with earth people.

You said Billy This, however, I have not noticed yet a lot of it. Semjase 238. I do not lie to you, you will recognise the truth of my words really still early enough.

Billy Ich no word spoke of lie, but you really do not want to say who will give me a suitable list of the mentioned life forms?

Semjase

239. It should be to you a happy surprise, I said this to you, nevertheless.

18

You let Plejadisch-plejarische contact reports, conversations, block 2 Billy Dann it be level, you secretive person. Semjase 240. You really take care free of charge.

Then I have Billy Gut, another question: Can you say to me once how many extraterrestrial of good form had contact since altersher with earth people?

Semjase

241. I have expected this question for a long time from you, which is why I have also taken care of the necessary data.

242. Your question was really to be foreseen for a long time:

243. To the earth many extra-terrestrial intelligence from the whole width of the Milky Way came since millenniums.

244. Nevertheless, for several centuries these are only very much a few, and only least from these tried to pursue with earth people communication or to close even narrower contact.

245. In the principal acted only those which were interested to show new and better or simply future ways to the people of the earth.

246. On the whole it concerned with this intelligence very distant descendants of your indirect forefathers, and only in very rare cases these were different life forms, probably, nevertheless, largely more humanely of human form.

247. I can call the exact answer of your question, however, with the fact that from all extra-terrestrial earth visitors only 0.57% are which got in contact with earth people.

248. There are excluded, besides, the wide-got here from the depths of the universe which became resident on the earth before primeval times and came into the earthly history of mankind. Billy This is not exactly a lot. But there I have once a question which occupies me for a long time namely with regard to a statement of the Christian Bible. Nevertheless, it is there the speech of an anti-time or such a thing. When should this time come then?

Billy This is not exactly a lot. But there I have once a question which occupies me for a long time namely with regard to a statement of the Christian Bible. Nevertheless, it is there the speech of an anti-time or such a thing. When should this time come then?

Semjase

249. It is this the prophesied and in the Christian Bible wrong laid out anti-time or anti-Christian's time in which the earth person will escape from the religious mania and turn again to the truth.

250. This time hangs together with the cosmic age of the Aquarius, and the anti-time has already begun with the defection of the first half in the second half of the transition period, namely exactly at 11.20 o'clock CET on the 3rd February, 1937.

Billy This would be the catastrophic weird nit, mass murders of the churches and other religions and political and religious wars, the Ausartungen of the people and, otherwise, all evil of the last centuries and the next time, by the old prophets and also by Jmmanuel to prophesied disasters etc.?

Semjase

251. Certainly, only that they have not found her completion yet, because the heaviest events sectarian murders and mass suicides as well as religious murderous excesses, neonazistischer and other terror stand first even before, namely by left radical elements on the right and groupings.

252. However, physical disasters will not least get out of control from now on also in degenerating form, namely by own guilt of the earth humanity.

253. Also revolutions and wars will get out of control in menacing masses.

Billy Dann can still become rather cheerful it. Do the nuclear wooden heads still throw her squibs on the skulls to themselves then, nevertheless?

Semjase

254. This danger might be banished at least at the moment, and according to the likelihood calculations this should be able to be excluded at least till the third millennium.

Plejadisch-plejarische contact reports, conversations, block 2 19

255. The values lie at 99.8 percent, consequently only a breaking through insanity of a ruler or the inattentiveness of a person a nuclear war could release.

Billy Das heisst so much like that vorderhand no more nuclear war is to be feared?

Semjase

256. Certainly if you think, besides, of a real world war.

Billy Dann can calm down the humanity, at least for the next two or three decades. Semjase 257. Certainly, because such a war would be to be ascribed really only to a breaking through insanity or an inattentiveness.

258. The likelihood calculations mean with the highest values.

Billy Worauf one can count? Semjase

259. With complete security.

Billy Es is reassuring to know this, one sleeps maybe now in different houses a little more quietly. However, it has been brought recently one more question to me with which I can start not a lot. Were sometimes, here on this slip of paper I have written down it: What is with the Mount Shasta? This is somewhere a mountain or a bigger hill on which mysterious things should take place. What does it have with it on itself?

Semjase

260. The Mount Shasta is an old volcano mountain with a partly still uninvestigated area in America, exactly is able to. Were sometimes, - rTTerauT aieSJetti Zclcl MäüU HIM fb auigebtrlHeTJcH! what is with aem/v\ount Shasta? This is somewhere a mountain or a bigger hill on which mysterious things should take place. What does it have with it on itself?

Semjase

260. The Mount Shasta is an old volcano mountain with a partly still uninvestigated area in America, exactly said in Nordkalifornien.

261. The mountains are very cleft and extremely heavy to mount.

262. Inside of the mountain itself is a small city which is inhabited by descendants of extraterrestrial and which also receive now and then visit from the space from her brothers.

263. It is a very majestic race, friedvoll and well which tries hard, nevertheless, anxiously not to be discovered by earth people.

264. The entrance to her very deeply subterranean city is well in disguise under the eastern mountain point, and it is impossible for earth people to find him.

265. If earth people find, however, once in her nearness, they are made movement-incapable by the ray weapons which carry most of the townsmen for safety reasons on themselves unsensible or are deflected.

266. Their golden-coloured spaceships in ball form, because they control the astronautics, can be sometimes seen if they do not protect this against view.

267. The people of this race are very well-proportioned in her appearance.

268. Their hair is mostly physical-coloured blond, long and wavy what fits very much to her graceful hyper-boreischen being.

They go for 269-th defiance of her shyness of earth people sometimes to their villages to do unrecognized barter with them after which they go away, however, again in a great hurry and flee if earth people come close to them too much.

270. However, the Mount Shasta is not the only place where this race lives, because they have split themselves already to too much early times in three smaller people and both other live unrecognized deeply underground on the Aleutian Islands and in Alaska.

271. The whole population amounts to only about 700 people.

Billy This is fantastically interesting and now thus something dawns to me. However, you have said just now something with regard to her appearance from which I could close that it concerns with this underground living race very distant descendants of the real Hyperboreer.

20

Plejadisch-plejarische contact reports, conversations, block 2 Semjase

272. You properly close.

Billy Männeken, this is incredible, then would be the descendant or distant descendants of those who carried out 180000 or 190000 years ago the real Entkolonisierung in the form which can count then as a prehistory of the today's human race, at least at least to the white race. Then among them must have been also of the JHWH, to the Henoch big wisdom given. Methusalem went in a later incarnation Henochs to this and Noah it was asked later by guard's angels to build that ark with which he landed then really on Ararat.

Semjase

273. Certainly, only the occurrence was so falsified with the construction of the ark which Noah has not built himself with his family and with the animals and all other that no more today's information with the truth agrees.

274. Wahrheitlich took place the events with the ark, however, at another time, 90000 years later.

Billy This is known to me very well, and in these distorted assertions the limitless stupidity and Ungebildetheit of the scribblers is expressed also fully, because how they could have written in

her imagination history, otherwise that Ararat is the highest mountain of the earth, and how would have, on the other hand, e.g., elephants as well as mammoths whom there were at that time still, rhinoceroses and all other 4-legged animals etc. from Ararat can climb down. I know by chance the mountain quite exactly and know that even a good mountaineer has his dear need and trouble if earth mountain wants to defeat.

Semjase

275. Not all earth people think logically and with sharp mind.

276. Many also live in any faith of an unreal religion which wants to defeat any reflexion and investigating after such interests worhiotot mountain to them.

ic nai, if he aen

Semjase

275. Not all earth people think logically and with sharp mind.

276. Many also live in any faith of an unreal religion which forbids any reflexion and investigating after such interests to them.

277. On the other hand, you also have to think that you are very widely travelled and have very exactly had a look at everything.

278. How I know, you have travelled around 43 lands of the earth and have been untiringly in investigations.

279. Thus you have found out - also with our help - many things more and have found than this the best archeologists and other scientists of the earth have ever managed.

280. In addition, you have travelled around with us the space and the DAL universe and have seen different foreign worlds and other life forms.

Billy Vielleicht you are right, however, I think that this is some too much fame on my mill. Say to me rather once, how long we must still wait here.

Semjase

281. At few minutes we can go away from here.

Billy Gut, then, however, I would like to try still with my film camera to film a satellite and the earth and maybe still the moon.

Semjase

282. You can do this, but when we are again back.

283. use in addition, however, then, in any case, the grid device and close then this source of light in it firmly.

284. The optics of your camera are not very light-strong - therefore.

Billy Wie you mean; can I do then, however, with it also admissions on the primeval world?

Semjase

285. Certainly.

Plejadisch-plejarische contact reports, conversations, block 2 21

Billy This is good - if I had only more films. Also I am covered with the slide films not quite well. I still wanted to get some, however, the money was not sufficient for me any more. Unfortunately, I am financial now, so to speak where one is on the last legs. I am simply bankrupt, and I can not even pay any more all calculations in the December.

Semjase

286. I know your problem.

287. However, you must be patient a little bit, because these are things in the activities which will help you.

Of 288-th banality your situation will still intensify, because in the middle of the next year you will have to take care of another place of residence.

Billy Aber why then?

Semjase

289. One wants to act to you badly and one fears you, also from the local government.

290. And because the house in which you live with your family to the municipality belongs, it is not surprising that one will discontinue the residential contract to you.

Nevertheless, Billy Ich acts to nobody a little bit zuleide.

Semjase

291. Certain people fear the truth and they are not able to take it that they are in the wrong.

292. You have said the truth to them, however, they have not recognised the truth and have

accused you to the lie.

293. Now, however, they had to bring in experience that they themselves have passed to the untruthfulness what they are not able to take.

294. They looked very knowing and suddenly had to recognise that they are in the wrong what they want to deny, however, now.

Qio fl "ir / ~ h+on ohor/-Urr A . ikr" I "Sü" SSÄ. <!\*ÄS\* toMmakäRUmi moz-han I^Änntoct XA/ochalh cio Hiocon \Marr eagle/. † ^ä. jeizi mussren them auer in cianrurig uric-to, uass them seiDsi aer unwanrneit anneimgeTaiien sina what they are not able to take.

294. They looked very knowing and suddenly had to recognise that they are in the wrong what they want to deny, however, now.

295. However, they fear that you could make her stupidity evident, which is why they will search this way of the own protection.

296. Since if you otherwise cover a place of residence, they think illogically, you could not reveal her stupidity any more.

I have Billy Daran also no interest. But it had to come once so far, this was to be foreseen. After all...

Semjase

297. Certainly, however, it is only from good for you and your family.

298. Already ascetic said to you in 1956 that by the end of 1975 your flat life etc. adapts itself in quieter roads if you step with those people in contact from whom you will acquire then the building for sale from which you build up then the centre.

299. These are these events with another place of residence only one part of what will bring you the future in connection with the fulfilment of your mission.

I cannot live Billy Schön and well, but of it really.

Semjase

300. It will become better.

Billy Du can talk really well and easily, for me, however, it can become quite disagreeable, in the end, I still have woman and children. But I do not want to complain with it, I only want to say really that it presently really looks a little bit awfully with my finances. However, anyhow I must probably finish with it.

Semjase

301. This is sure in such a way, on the other hand, however, you are a little bit too out-of-touch with regard to material values.

302. You should take care of this what is entitled to you.

22

Plejadisch-plejarische contact reports, conversations, block 2 303. You have to fulfil a very big task which should serve the whole humanity of the earth, you should be also recompensed for it from your people.

304. You yourself should be procured therefore.

Billy This is impossible - I am a hopeless anti-materialist on the one hand, and, on the other hand, I may not allow to pay my work in the form that I sell my knowledge. In the end, one has taught it me to the fulfilment of my task and one has trained me in it. This, however, really only therefore, so that I can fulfil my task because it just must be fulfilled. How did I would get around to letting pay for it?

Semjase

305. You degrade yourself.

306. You know very exactly that you have not received a lot simply learnt, but that you had to work the knowledge often under mortal danger and under very hard conditions.

307. However, on the other hand, it is in such a way that just your task is the most valuable one which must be also appreciated to you appropriately and be recompensed.

308. I know, you are a desperate anti-materialist, however, in your world you may be not in this form.

309. Your world is built up on materialism and consequently you must think to this according to whether you want now or not.

Billy Lass, nevertheless, you know exactly that I am not able to do this. Semjase 310. Then you must put with regard to these interests a governor about yourself.

311-th Mr. Jacob in Wetzikon would be, perhaps, a very suitable man for it.

312. He should take care of these interests for you and he has to do your financial interests in all things Is is also a part of his full time activity.

311-th Mr. Jacob in Wetzikon would be, perhaps, a very suitable man for it.

312. He should take care of these interests for you and he should protect your financial interests in all things.

313. This is also a part of his full time activity.

Billy Du does me really laugh, Semjase. Nevertheless, I am really no Shaking. Semjase 314.

However, I would want in your interest that he takes care of these your interests, because you must be able to live.

Now Billy Dein Wunsch in honour, Semjase, but I am once an anti-materialist and cannot become simply suddenly a materialist.

Semjase

315. However, I also did not speak of it, of it that Mr. Jacob perceives your financial interests. Then he has to do Billy Gut, well, if he wants, but leaves alone me with it now please. I have never had so much theatres really around the money because of and around my person. If we speak, nevertheless, better of something other. You have said just now something with regard to the hair of the people in the Mount Shasta, this reminds me of something quite special. Here - there, these are scissors. Sweetly, what?

Semjase

316. Nevertheless, this is a working device.

Billy Natürlich, one can call it also so; however, do you know for what such a thing is good?

Semjase 317. It is determined to cut materials.

Billy Genau, one can cut with it even hair or take a short-cut.

Plejadisch-plejarische contact reports, conversations, block 2 23

Semjase

318. Certainly, but what do you want with it?

To cut off Billy Nichts less than you a decent Wüschel hair which we want to lay in our glass cabinet as memory to you, so to speak. If you know, as something personal about yourself. We want to pursue with it no cult. Here, there I have one more string to bind a decent bundle. Nevertheless, you will have nothing against it, or?

Semjase

319. - You have really sometimes ideas; if, however, you think that it could be a joy for you? Then I am allowed to do Billy Natürlich? - So, ties together to me please this bundle. - Pulls only a little more firmly, the thread does not tear so fast. - Property. So, now we want sometimes - ah, nicely, this is a nice memory, there everything will be glad about it.

Semjase

320. Is it really enough?

Billy Bestimmt, I want to miss to you no bald fleece. Semjase 321. Then let us go now.

Then Billy Aha, only zooms off. Ah, the mill already runs; but where is then Ptaah?

Semjase

322. Just he is hinübergewechselt; however, see now, there is the Bermudas.

Biny Ana, aann whizzes only ios. Ana, uic; vlume lauu bcrron; aoer where is then Kiaanr Semjase

322. Just he is hinübergewechselt; however, see now, there is the Bermudas.

Billy Prachtvoll is to be looked this from here. Eiah, want you to drown us in the sea? Semjase

323. I want only close down to be able to predemonstrate to you the crossing in such a way as he is also experienced by earthly pilots and crews.

Billy Ach so, then just loose.

Semjase

324. You really seem to own no nerves.

325. Think with this crossing now that it does not concern that which ordinarily exists.

326. It is this the crossing to the dimension of the three world.

327. So it concerns another dimension than that into which ships and airplanes penetrate. Billy Um which kind of dimension concerns it then with the others?

Semjase

328. In that dimension the world already floats in distant future, from that, very seldom, however,

also the inhabitants on the earth from this time penetrate.

This is Billy So, girls, but - human child, we are already in the middle of the thing in it, and, besides, one could see nothing generally what would have pointed to a radiation or, otherwise, something. Girls, this is really fantastic. I see moment, - girl, behind myself my own world, and there in front is something absolutely strange, some game and earthy.

Semjase

329. Now we are precise in the scabbard point of the whirl, hence, you are able to see both dimensions.

330. Before us is the primeval world as I have described them to you.

24 Plejadisch-plejarische contact reports, conversations, block 2 Billy This is simply great. Do we want now completely hineinrutschen? Semjase 331. We already are in it as you see.

Billy??? - Now these - this there in front are two again of the aforesaid worlds? Semjase 332.

Certainly, as well as I have described them to you.

Billy Phantastisch, simply fantastically, girls, there in front puts Ptaah. Does he come up then again from the primeval world?

Semjase

333. Certainly, but he would not have landed on the planet.

334. Now, however, we go to him and leave my ray ship there.

Billy Prima, then we can poke around something in the world. Have you really made a protective suit for me?

Semjase

335. Certainly, and we have also taken into consideration that you are able to move your arm in the suit in such a way that you can serve your camera.

Billy Und the film camera?

Semjase:

336. This would have the Armm 711 nnförmia fxemarht. aass ouch yours hotoapparai ueaiericn were able to. Billy Und the film camera? Semjase:

336. This would have made the suit too shapeless.

337. If you want to do, however, here photographs, I fly around you by my ship for the time being still in the world.

338. Then, however, for the admissions you must use the grid device because we cannot get out without suits.

Then Billy Gemacht, zooms off sometimes. I would like to banish some saurians on the stripe.

Semjase 339. As you want, however, is sparing with the film if you have only a few as you said.

(Semjase speaks by a communication device with her father, then we investigate during about two hours by her ray ship the planet, the primeval world. I can do different admissions of saurians and the scenery, before we smuggle to her father into his Riesenraumer. Nothing was spoken during the 2-hour expedition flight of importance, according to Semjase this short entertainment of the transmission worth does not find. Explanation from the 8th December, 1975.) (Already in the spaceship of Ptaah, after the greeting.) Ptaah

1. It is to me really a joy, you sees again.

Billy This completely lies on my side. How, however, it is with it: Semjase has said to me that we are able to do some going for a walk on this primeval world.

Ptaah

2. This is right.

3. We let you produce a suit by which you can take photos. Billy Semjase already said this to me. Then I would also want a photo of you and me in the suit.

Plejadisch-plejarische contact reports, conversations, block 2 25

Semjase

340. I will do this. Ptaah

4. However, you may not spread my picture. Indeed, Billy This is a pity, but if you want so... Ptaah

5. Unfortunately, it must be, because, nevertheless, maybe I must move once on the earth in your time. Billy Ich understands, you do not want to be recognised.

Ptaah

6. This is in such a way, it is a precaution.

7. However, lets us go now.

(We let ourselves by the transport shaft in the hangar hinuntergleiten where we rise in the protective suits. Then with Semjases ray ship we glide out on the primeval world and cruise about long time on her. At different places we leave her ship, and I can banish some saurians and sceneries on my slide film. Partial Semjase paralyzes the big animals from her ship to make easier to me the filming. Then the animals stand as numbly. Then as promised she also does a photo of Ptaah and me. After many hours only we return again in the Riesenraumer.) Billy This was a fantastic excursion.

Ptaah, ah

8. Still no earth person had these Möglichkeiten

» Al:-----1---1:---

Billy This was a fantastic excursion.

Ptaah

8. Still no earth person had this possibility.

9. We will show you later also the Third World there in front, but also her moon.

10. The world there is of your time about 870 years ahead, thus the people are also developed accordingly in her technology and own own ray ships by which they reach now and then to your earth.

11. Also on her moon they have settled and have built many stations.

12. We will not visit the middle world, because she does not matter.

13. There exists quite varied life on her and her oxygen salary is very big, however, you have seen such world bodies already on your big trip.

Billy Können we fly then not immediately?

Semjase

341. The different things which we can do here are still to be done. Billy Du is rather mysterious again. Ptaah 14. It is no secret; we look here for an overdue ray ship of a life form known to us from our dimension.

15. It has penetrated some days ago and owns no possibilities for own return.

You want to find Billy Wie this then? Ptaah 16. We have sent out several Raumanalysatoren to explore everything.

17. In at the latest from two to three hours we will know her results.

Billy Dann we must stay here so long?

26

Plejadisch-plejarische contact reports, conversations, block 2 Semjase 342. Certainly.

Boringly it will not become Billy Auch well, certainly, in addition, I still have many questions. Ptaah

18. You are untiring in it.

Billy Ich is just interested in all. Semjase has announced me in one of the former contacts that it should soon go off again with the mind apprenticeship; however, the good girl transmits nothing to me with respect to that, on the other hand, however, it seems to me, as if she conceals something from me.

Ptaah

19. My daughter is sometimes mysterious really a little bit, she has done to you with regard to the mind apprenticeship even partial information.

20. The full fact is that that the real mind apprenticeship should be transmitted not by us, but from a very high mind level with which even we are able to get in contact only by the high council and this again only by Arahath Athersata.

Billy This would be the level of the Petale by which to us Twelve orders were given, or?

Ptaah

21. This is in such a way.

22. From this level are transmitted to you künftighin certain information for the mind apprenticeship and you have to work out then, however, everything itself finally.

23. Ten orders, resp. Twelve orders were the beginning of the transmissions.

24. Because these transmissions claim from you, nevertheless, extremely many forces, however, longer Zwischenwobei you have to do then everything itself finally has to work out.

23. Ten orders, resp. Twelve orders were the beginning of the transmissions.

24. Because these transmissions claim from you, nevertheless, extremely many forces, longer space must be kept by a transmission to the others.

Nevertheless, transmissions can receive, however, also in the run metre Billy Andere Menschen, without they wear themselves out, besides.

Ptaah

25. You know very exactly that this is not the case and that the majority of the so-called media has no contacts with such or even different-dimensioned life forms in truth that it is defeated partially only by one selfdeception or gets to believe quite consciously fraudulently such contacts.

26. Real contacts with higher levels pass only very much a few and valuable transmissions are even rarer.

27. The earth people, however, who could have real contacts in this form with other life forms and higher mind levels would be able to pursue the communication not simply according to pleasure and chronologically indefinitely, because her forces would be diminished very strongly by these contacts, thus they had to be renewed for every new contact what often would take up many weeks or even several months.

28. Such achievements of violence, as they are claimed from you, would be never able to take them, because they would die the death in complete exhaustion.

29. You know why.

Billy Natürlich. However, your speech means that I will have to perform enormously a lot of work again, because with Petale I must write everything twice. I receive the transmissions only by hand, with the machine it simply does not work.

Ptaah

30. This is known to me and it has his reasons for it.

31. However, by Quetzals technical help you are able to write with your writing utensil extremely fast and you must let out, nevertheless, nevertheless, many sentences and often also wrong words writes etc...

Plejadisch-plejarische contact reports, conversations, block 2 27 from what often the opposite of the said and explained etc. originate, consequently have to do my daughter often with you zusammensitzen to carry out the necessary corrections which you must use then between the written lines. 32. Everything is complicated, so unfortunately, a little bit, however, unfortunately, it is not different to arrange.

Billy This I can be calculated. Then I must resign myself willy nilly to it. Another question which I still have on camp concerns something else. I would like to know with pleasure what has it with certain Salvador Villanueva Medina on itself which has written a book about his contacts with extraterrestrial and his flights to other planets. I have the book of Mr. K. to the reading receive. Completely I have not perused it, however, yet.

Ptaah

33. You should also not take care further of it, because all information in this writing is fictitious.

Billy This means that the man is a swindler?

Ptaah

34. In every sense yes, even if he wants to serve with it a good purpose.

35. By variously UFO reports he has gone to ruin to very strong imagination and, besides, has been influenced extremely strongly by Adam's ski.

36. As a starry-eyed idealist, with a certain hatred impact on the earthly human life forms, it was only a compulsive result to venture with dubious assertions in his work which was not written, by the way, about him, on the general public.

This is Billy Ach so, but why does he feel then hatred in himself against the earth people?

Semjase

343. On the one hand therefore because he is able to reach no position of power by his minimum abilities in every respect, and, on the other hand, therefore because him his own appearance depresses and see unBilly Oh, I see this is, but why does he feel then hatred in himself against the earth people?

Semjase

343. On the one hand therefore because he is able to reach no position of power by his minimum abilities in every respect, and, on the other hand, therefore because him his own appearance depresses and he seems to itself out of proportion.

Billy Aha, then this might probably be also the reason, why he says in his book, with regard to supposed two French on the imaginary planet that they have been typical and ugly earth people

out of proportion, or? Psychological seen I can find at least in it the reason for this representation.  
Ptaah

37. You think very sharply and exactly.

38. The grounds of his statement are to be found really in it.

Billy Wie could be also different it, but from his assertion which I find for the earth people very slighting the question arises what has it with it really on itself. I think with whether the earth person is really so out of proportion and ugly if one compares him to other life forms in the universe.

Ptaah

39. The earth person is an offspring of a human form extremely sophisticated in every form from the depths of the universe.

40. Accordingly he is also sophisticated in his proportional form.

41. With respect to that he is treated as equal to our own race which is already developed about 30 million years.

42. Even the life forms which are still developed register no better or nicer proportions, and also among them those which the earth person would call ugly are found.

43. The proportional beauty of the earth person was already recognised in old Greece, which is why the people exceeding this beauty norm were called GOOD-LOOKER.

28

Plejadisch-plejarische contact reports, conversations, block 2 44. At the past the earth person had run wild a little bit, thus only in few the real beauty was recognised, while those by which it was recognised were called the BEAUTIES when I use the today's earth-human concepts in addition.

45. At the today's time, however, because the earth person has filed his biggest wildness and itself consciously maintains for his appearance, his beauty given to him is effective in the whole appearance, thus today with respect to that of the majority of the earth humanity as can be spoken of good-looker's forms.

46. This refers on his physiognomisches, form bulky and also on his proportionelles appearance.

47. The earth person is one of the most best-proportioned and bestaussehendsten human life forms in the universe which is excelled only by her real forefathers around little who have reached the best possible perfection in proportioneller regard.

48. However, the difference is not very big any more, because the material form is defeated by borders and cannot be extended.

Billy Dann is the assertion of Villanueva nonsense, so to speak a little bit underdeveloped <spiritual> Stinkbombe.

Ptaah

49. Indeed if you feel like to express this so.

There might be Billy Demgemäss no so-called supernatural beauty etc.? Ptaah 50. This is a distinct imagination more ill-mannered of earth-human life forms which thereby want to make her deceitful assertions believable that they have stepped with extraterrestrial in contact.

51. In the whole universe, neither in this nor in an another, the norm of the beauty can be crossed, because it is limited really. and » as binu auigcsuiui-iiciic i ! laiiluju-i ! uiiguunuuLui uuuiiiieisuiiucrTeTJeTTsTörrtten which want to make believable dadurcn her deceitful assertions that they have stepped with extraterrestrial in contact.

51. In the whole universe, neither in this nor in an another, the norm of the beauty can be crossed, because it is limited really.

52. If this border is crossed, however, a Degenerierung already occurs, and the concerning life form must be called ugly again if I judge by earthly beauty concepts.

53. Hence, there is also able to be no supernatural beauty how you have mentioned this.

54. All material is arranged to certain borders which can be never crossed.

55. Only the imagination is able to cross these borders without being able to realise them, nevertheless, one day.

Nevertheless, Billy Elisabeth Klarer, e.g., has also stated that she has an extraterrestrial of supernatural beauty grievedly and from him even a son. But also Adam's ski and different other spoke of extraterrestrial or supernatural beauty.

Ptaah

56. Every rationally thinking earth person is able to recognise the untruthfulness of her assertions

by it, because only the imagination is able to generate such pictures.

57. However, they are not more than one hallucination which shows a momentary fatamorganaähnliche manifestation to grow pale already in the next split second again for good. You classify Billy Als what then the interpretation of Villanueva? Ptaah 58. She signifies a hatred-born and weltverbesserliche slander of the earth people. Billy Also insults for us sorry mortals? Ptaah

59. This is in such a way.

Plejadisch-plejarische contact reports, conversations, block 2 29

Billy Dann is not his philanthropy really from very far-fetched. Ptaah 60. It is only played and serves the purpose of the profit.

Billy Dann there lies the case clearly. However, you should explain yourself something else once for everything for our thing interesting, namely them or certain connections with the age of the earth person. About these things I already know, because Sfath has informed me already as a boy about that. Nevertheless, these things were never written down, consequently one is not oriented about that. I think with it the fact that the mental forces of every single person are able to lift the vitality of the next one or to be lowered.

Ptaah

61. Indeed, this question is from big meaning, and I will give to you about that for all information;

62. The age one any life form is determined partially by the outside forces penetrating on them more cosmically as well as kind according to food and according to environment etc. as well as by forces more different resp. of life forms of the same kind and, however, the genes play the prevailing role.

63. Because the thinking of a life form generates an extremely logical, so a strength according to creation by the cooperation of the mind which is released as highly popular oscillations and radiations, an immense strength which is able to influence everything is generated with it.

64. This strength according to creation penetrates into everything, really in all material life forms and matters one to influence them according to her kind and form.

65. Any life form has to her genes and her life level gemässe life span, thus also the human forms of the earth.

66. At the earliest times when the person of the earth was also generated by his indirect forefathers his average age with 1007 years was to be calculated, because by his producers trained and informed, he disposed of a huge level of knowledge and skill state.

67. Unexpectedly fast, nevertheless, he passed to the religions with her crazy apprenticeships and thereby went of the true lichen knowledge and the truth forfeit.

8. Necessarily he also started to work against all natural laws, became to them foreign and lived his average age with 1007 years was to be calculated, because by his producers trained and informed, he disposed of a huge level of knowledge and skill state.

67. Unexpectedly fast, nevertheless, he passed to the religions with her crazy apprenticeships and thereby went of the true lichen knowledge and the truth forfeit.

68. Necessarily he also started to work against all natural laws, became to them foreign and lived of order and gesetzesbrecherisch.

69. Everything together passed to the loss of the high average life span which dropped in the course of the millenniums deeper and deeper and settled down with a Zwanzigstel of the former time, namely in particular, because the most different influence about many Jahrzigtausende impaired away the life negatively and also changed the genes.

70. Only since beginning of the new age an idiom stands out again to the better, thus itself the average life span lifts again slowly.

71. The principal reason for it is to be found in the recognition of the truth and in the positive evolution linked with it.

72. The more itself the developing direction again turns to the truth, the higher the average life span develops again, because by them the changed genetic and all the other life-preserving factors adjust themselves also again which were nastily impaired in the course of the Jahrzigtausende.

73. The mass of the earth people moving in consciously evolutiven forms is relatively still very low and is often connected only at the beginnings of the real truth, thus up to now still no big progress was achieved.

74. However, the more itself the earth person of the real truth and with it also turns to the evolution in all areas and thus also in the relation of the life lengthening, all the more his life average age rises again.

75. Nevertheless, in the whole is seen every single life form by the most important meaning, namely in her thinking and in the forces nascent with it.

76. Every thought emits as an immense strength and meets the other life forms which they pull like magnets at themselves.

77. According to quality, negatively, positively or well-balanced, they generate in the life forms catching them forces of the same kind with appropriate effects.

78. Positive forces generate positive forces, negative forces accordingly of course again negative forces.

30

Plejadisch-plejarische contact reports, conversations, block 2 79. However, by the crazy apprenticeships and other deceptions of the religions the earth person is able to unfold many forces which affect all life forms destroying in the principal.

80. These destructions are based in the fact that they impair etc. the age as a result of crazy apprenticeships and wrong life-styles, lower so the average age.

81. The greater the gatherings of people are, thus, e.g., in cities, the deeper sinks the average age, because just at such places extensive energy of thought concerning wrong life-styles becomes free and penetrates unconsciously into the next ones.

82. However, also animals and many matters are impaired by these destructive forces of the human unreason and pass thus to an untimely destruction, as for example the iron which ordinarily never rusts so fast as is it at the moment on the earth the case, and which only therefore because the atmosphere and environment are destroyed by the progress generated according to ideas and mental.

83. However, the most dangerous memories of wrong humanely generated of thought oscillation forces are precious metals, precious stones and crystals which fortify this energy often in deadly tin.

84. Thus an earth person in the death of a person thinks under circumstances guilty, bewusstoder unconsciously if he looks after in negatively degenerated form and feelings and maintains and thereby uncontrollable destructive forces releases.

85. If the earth person wants to think properly and scoop ungsmäßig and evolutionieren, then he may move his mental form neither in degenerated negative one nor in degenerated positive roads, because both are Ausartungen which can generate very bad and negative results, thus they are creation-contrary.

86. Right thinking and Evolutionieren explain themselves by a well-balanced and neutral way of thinking and by a right action and by right feelings which generate then ebensolche forces and send out by which life is generated and is received and an evolution really appropriate for creation is walked.

Billy This is very interesting; I hope only that your explanations are executive enough, because for the people of my world all that is still very heavy to understand.

Descntren wiru.

Billy This is very interesting; I hope only that your explanations are executive enough, because for the people of my world all that is still very heavy to understand.

Ptaah

87. Unfortunately, this is in such a way, because many earth people still try too little to be able to understand a certain knowledge totally.

Billy Dies is also often based in the fact that many people with everyday worries are overloaded too much.

Ptaah

88. This may be fine, nevertheless, however, it does not entitle them to neglect the values of the mind.

89. In the whole universe is found no life form which would have to do no work according to consciousness for her existence, nevertheless, however, they devote themselves to the value apprenticeship of the mind.

90. Work and worries never are an excuse for the Nichtbefolgen of the given laws and orders.

91. There is not only enough effort because the material is judged as more important.  
Billy This will be fine, Ptaah, however, the people cannot be persuaded of it so easily. Hence, many also believe that everything has been laid myself by a gentle chance simply in the shoot, although I had to learn something together with my everyday work, just as it every other person must also act.

Ptaah

92. You are very sparing with your own praise and your speech lies far from the truth.

93. You should not degrade yourself constantly if, finally, only you learnt.

94. You speak very disparagingly of yourself and your achievements.

95. Indeed, I am older in many centuries than you, but I feel the highest esteem for you, however, I cannot favour your strong modesty, because she does not correspond to your level.

96. You are to be given, which is why you can also not find the way about your world in certain interests and I think of the materialist interests.

97. It would be...

Plejadisch-plejarische contact reports, conversations, block 2 31

Billy Fange now only you still with it in - Semjase has already wiped out one to me. Ptaah 98.

However, it would be really better for you and your family if you took care only a little of the materialism which is anyway demanded in your world.

99. You and your family must own the necessary to be able to eke out the life.

100. Without certain materialism you cannot exist.

Billy Entschuldige Ptaah, you are probably a very wise man, from the age once completely seen, but anyhow you think wrong, because me mu...

Ptaah

101. Want you to teach me really?

I want Billy Genau this, even if it maybe does not fit you in the junk. Ptaah 102. You bisterregt.

I am Billy This, I add this, because it... Ptaah 103. Your excitement is incomprehensible to me.

104. Nevertheless, I try only to help you and to revise your wrong view.

105. In my opinion you act inaccurately and this you also know very exactly.

106. In your world you cannot live without materialist trends, quite indifferently whether these trends are real now or simply an Aufgezwungenheit.

107. If you, however, in such a way...

105. In my opinion you act inaccurately and this you also know very exactly.

106. In your world you cannot live without materialist trends, quite indifferently whether these trends are real now or simply an Aufgezwungenheit.

107. If you, however, in such a way...

Billy Jetzt listen to me please once certainly, Ptaah: I feel a whole respectable amount of respect and esteem towards you, and this not only your age because of which really all the same to peep to me. And whether it are now a JHWH or not, this deals with the thing also nothing, because titles are a sound and smoke and from absolute insignificance for me. My respect and esteem are built up on completely different things, you can think this me quiet, and I have...

Semjase

344. You speak very disrespectfully with my father. Ptaah 108. Do not interrupt him, he should pronounce his opinion.

Billy Danke, Ptaah. I wanted to say: ... and I has never still met a person to whom I could bring so much respect as just to you. This not even was with Sfath the case. However, nevertheless, this does not mean that you cannot wander also once or simply tell a cheese because you presumably do not know the precise backgrounds. Well, I am yours, Semjases and all view known to me after a quite damned anti-materialist. With it are right her all one with certainty absolutely. This is why you pick also permanently on me and try to strangle me from my anti-materialism. You think actual that I could simply play at least a little materialism and does not think of the danger which can originate from it. Think once that to me Sfath has made the hell hot of the damned materialism' because of at that time nearly 40 years ago. He has to me shows done that a prophet, as you call me always pompous, never can do justice to his mission if he has even gone to ruin with an iota to the materialism. I have exactly considered this at that time as a teenage boy completely damn, therefore, has studied the people thoroughly and have thereby come at last to the examination that if I want to fulfil my task really I must be free then really of the

smallest iota of the materialism', because I, otherwise, 32

Plejadisch-plejarische contact reports, conversations, block 2 to my task can never do justice. I also recognised that I will be able only by filing the last Restchens materialism to return a property entrusted to me just again as I have received it. From it again resulted the recognition that the materialism also refers to words, speeches and thoughts, consequently also words, the speech and the thoughts of every still so small materialism must be free if one wants to be an anti-materialist really in honesty. Hence, it is also absolutely impossible that I could simply play certain trends of the materialism. Faith to me, Ptaah, it was not damn easily for me to renounce the materialism in the form that he concerns me not even more for the welfare of my everyday bread. I needed many years in addition - nearly two decades even. However, I have created it. And only when I had reached this, I also had the sure certainty that me any more the least form of a materialist flight from the road could not throw if I had to fulfil my task in close future. This was to me the certainty again that I will also return every or word said to me transmitted in any way by the dismantling of the last tiny bit to materialism so verbatim as it is entrusted with me. By the dismantling of the materialism I am also give become to such an extent and in the things in which modesty is necessary. This modesty preserves me also to change even one single iota of a word after my own sense or Gutdünken if a word is transmitted to me or is said. I return everything so verbatim as I receive it, even if I am called, therefore, often a liar. Faith to me, Ptaah, it is really impossible for me even to play materialism, because this would endanger my task. Think that from a play damn quickly bad and bitter seriousness becomes by which the best person with the best intentions tips over slowly indeed and becomes one day in such a way as he has a certain time hindurchgespielt itself. Against it there are only one single means to the defence that one gets involved since under no circumstances in such a play. This would be angry irresponsibly and. On the other hand, however, my anti-materialism has become in me the conviction in such a stable form that he is not to be cancelled any more - also not only to the play what signifies also again nothing else than to my own advantage. Even if you offered me an immense treasure by which I could give up my anti-materialism, would not be to me such activities möelieh stable form that he is not to be cancelled any more - also not only to the play what signifies also again nothing else than to my own advantage. Even if you offered me an immense treasure by which I could give up my anti-materialism, such activities would not be possible to me.

Ptaah

109. You tune me thoughtfully... 110. - I have never roofed these things in this form. 111. It seems to me to have done to you wrong. 112. It is odd, but I feel aching emotions in myself for you.

113. It is very odd, dear friend...

114. Anyhow it seems to me more and more often that you stand in many things about me...

Semjase

345. It - it is to me very much blow.

Billy Lasst, nevertheless, the nonsense, mawkishness is not really on the place. Nevertheless, everything, also you, wanted a sorry mortal who fulfils a certain task conscientiously after all contentment. Now well, I was done up in addition and zurechtgeflickt, and maybe I also have a little bit more still myself dazusetzen than I have accepted up to now, this may be maybe right, well, but with it the thing has really done itself.

Ptaah

115. This is not whole in such a way, because these things were not anxious from us.

116. It is to me very much suffer, I was with my statements in the wrong.

117. However, it is to me a the bigger joy that I might find out the instruction by you. Semjase

346. It is to me very much suffer.

Plejadisch-plejarische contact reports, conversations, block 2 33 347. My words just now, which I...

Nevertheless, Billy Lasst, nevertheless, now the nonsense, we are here in no sentimentality theatre. Ptaah 118. You violate your feelings.

Billy Ihr must just still speak of feelings. You yourselves have always said that one must have them under control. And who has this now, hey? In any case, I cannot complain about it.

Semjase

348. You are very hard. Ptaah

119. This is real in such a way.

One has taught Billy This me thus. Ptaah 120. You yourself have learnt it because your school was inhuman. Nevertheless, Billy This is nonsense, I still live.

Ptaah

121. I know this really better than you, because you look at these interests only from your perspective and this is totally different from the extreme portable norm of the earth people.

122. However, I have done to myself thought around your explanations and have recognised that you properly think and act.

3. You most sluggishly a very big responsibility with regard to your task, which you really only to eriÜÜfci-----4-----1. J: I:-----\* uiese isi gruiiuvcbv-riicucn vun uci acresersiei i uaguaien MUini uer truerimenbUleN.

122. However, I have done to myself thought around your explanations and have recognised that you properly think and act.

123. You most sluggishly a very big responsibility with regard to your task which you are able to fulfil really only if you move in your anti-materialism and in your relevant modesty.

124. However, this has become clear to me only just now when you have spoken in your excitement.

125. My own statements were very mindless.

126. However, you should not have to live in want.

127. No work is on the earth of her wage at the moment so much of the value like yours.

128. Therefore, the earth people should give to you wage and nourish you and your family and give you the necessary.

I cannot require Billy This, now Ptaah, this you know. It simply does not go. Ptaah 129. I have not finished my explanation yet:

130. I did not speak of the fact that you should do this.

131. It should be a voluntary Erweisung of all those people who respect your work and find them of a wage worth.

Billy Du does me laugh. You talk a quite swollen language of the open begging. However, I am no beggar, Ptaah.

Ptaah

132. Your speech is illogical, because voluntary Erweisungen always occur in honesty for some property.

Billy Also, nevertheless, a form of the begging, only that she is just indirect. However, I do not want to beg, condemns over again. And in fulfilment of my task I do not work to get rich.

Ptaah

133. You and your family must be able to live, also you do not beg indirectly and cannot be also paid you for your work.

34

However, Plejadisch-plejarische contact reports, conversations, block 2 Billy Es are in such a way. Ptaah

134. You speak illogically. Semjase

349. I see no hope, father.

350. For this reason I have already brought home to him that he should allow to administer certain interests by a friend, thus, for example, the sales of him to transmitted writings or book works.

351. However, he explained that he thereby became the baby.

352. However, it is my wish that he entrusts with these interests a friend, because, otherwise, he gives the writings and book works in distribution without receiving the Deut of thanks or wage for all his work even.

Ptaah

135. This would not be right - your idea is very good. Billy Ich can still do what I want. Ptaah 136. You are not allowed to do this, because what is given you voluntarily, this is given in honesty and serves you and your family for the life.

137. use, hence, gifts to you not again for other help.

138. Others need to the help less than you.

139. Often you are only used.

Billy Damit I myself must finish.

Ptaah

140. But you and your family thereby live in want.

141. Hear now what I have to say to you:

142. The wish of my daughter is entitled and good.

143. Order, hence, a friend with the management of those interests which protect your existence you.

144. You have to perform the heaviest task, consequently you should transmit writings and book works etc. with adequate remuneration.

145. It is this no form of a greed or an other materialism, and if to you gifts are kept closed, this does not signify the acceptance of a begging property.

146. It is only the right which is entitled to you in your world, as well as every other life form of your world which explains every one employment to be fed for it entlohnt and.

147. Think of the old prophets who were long before your time.

148. They were not probably coined so anti-materialist like you, depended, however, also them on Erweisungen for her work which they had to accept to live and to be able to exist.

149. Think also of the birds under the sky, also they work and become for it entlohnt.

150. Their desire steers them to the hunt for vermin which they catch and exterminate to protect pflanzliche and other life forms against them.

151. They are recompensed for it with the fact that they are provided by exterminating the vermin with all what satisfies the hunger to them lends them forces and her plumage in splendid polishing allows to appear.

Billy Man could mean, you are an ornithologist or a romantic. Ptaah 152. Nobody applies, however, you want to give with your statement only to the subject another idiom.

153. It is very unpopular one to you.

154. After all what I know now I hold your anti-materialism in honour, and I count myself luck-like to know him in you anchored, however, must be helped to you, thus it also my wish is that a friend good to you with good knowledge takes care of the mentioned interests.

Plejadisch-plejarische contact reports, conversations, block 2 35

Billy This really does not go, Ptaah. It simply does not go. Ptaah 155. You bring me severely in excitement.

156. Hear now very exactly my question:

157. Want you to endanger our and your very important task or question even? Billy Bestimmt not, Ptaah.

Ptaah

158. Have you still to live the necessary means? Billy Ich - now, it still goes.

Ptaah

159. You escape from my question.

160. Have you still to live the necessary means?

161. Your answer should be or.

Nevertheless, Billy Ich said... Ptaah

162. Your answer.

Billy Nein, I - well, I there bankrupt and can not even pay any more my calculations from the December.

Billy Nein, I - well, I there bankrupt and can not even pay any more my calculations from the December.

Ptaah

163. And the party which celebrates her too .Immanuels honour? Nevertheless, Billy Du knows that this is only one pseudo party. Ptaah 164. You do not answer my question.

Billy Gut then, we do a small Christmas small tree for the children. Ptaah 165. And further?

Billy Was further? - Anyhow I will already scrape together something to be able to buy to them also a present.

Ptaah

166. Thus lie the circumstances.

167. Living in want your family may not be and the same time about a year will not result any more in this form.

168. This is why I myself will be procured.

169. Künftighin I will control your relevant steps, therefore because I have to suggest now the following to you:

170. You said just now that you want to fulfil your mission.

171. This is very good in such a way.

172. You are able to fulfil them, however, only if you accept the help which one has offered you.

173. I impose on you as a duty that you proceed for the mentioned interests to a trustworthy friend in protection, thus he regulates the necessary interests for you and you have the necessary for yourself and your family to the maintenance.

36

Plejadisch-plejarische contact reports, conversations, block 2 174. Also I impose on you as a duty to accept added gifts as your property in love and honesty to you.

175. Should you not give satisfaction to this duty, I would have to interrupt all transmissions to you and all contacts for the duration of the time which you need to the meditation.

176. In the end, I would still like to say that you should accept künftighin the free thanks donations of those people and use to the living etc. for yourself and your family to which you stand supporting and in an advisory capacity aside, those donations of those people whom you release from physical and psychic sufferings also belong to it.

Billy Du is rather radical.

Ptaah

177. You force me to it, because I can and may not allow that you and your family live in want in your anyway materialist world and you are destroyed.

Billy Du means it really seriously?

Ptaah

178. My words correspond to my sense.

I correspond to Billy Dann simply to your wish and ask somebody whether he wants to fight with the mentioned things. You force me to it. However, believes me, I will not file, nevertheless, my anti-materialism, also not if her venom spits.

Ptaah

179. Of it was not also the speech.

180. You should as remain as you are.

181. Only a good friend should administer your called interests.

Billy Gut, then SDUre I just. You are able to do to me ahor not \ / prhiAt / » n / ha « \rh/-Won kVmtaktherirht only then Ptaah

179. Of it was not also the speech.

180. You should as remain as you are.

181. Only a good friend should administer your called interests.

Then I trace Billy Cut, just. However, you cannot forbid to me that I transmit this contact report only to all friends and friends when the tiresome holidays are over.

Ptaah

182. Semjase will transmit him to you already before this time.

Billy Aber I will quite simply have no time to print him. And can transmit I him when I have printed him.

Ptaah

183. You want to book this work with omission for certain reasons. Billy Genau.

Ptaah

184. I cannot hold you from it what I also do not want, because I understand you and your doubts very well.

Billy Jetzt a stone of the mill falls to me.

Ptaah

185. I exercise in this importance no compulsion on you, however where it is necessary for the purposes of your and your family welfare, I will intervene.

Billy Thema finishes?

Ptaah

186. It might be enough.

Plejadisch-plejarische contact reports, conversations, block 2 37

Then I have Billy Okay, one more question with regard to the Mount Shasta. I have already

spoken with Semjase about that, however, something still seems to me unclear. Semjase has explained to me, today distant descendants of the Hyperboreer would live in the mountain Shasta, on the Aleutian Islands and in Alaska. Nevertheless, Henoah, however, and also Jmmanuel spoke from <to hoists between the east and west> or between <the north and west>. Hence, I always thought that <green land> of the Hyperboreer, so Hyperborea had to have been somewhere far on top in the north, in Greenland or in such a way. Now, however, this does not make sense any more with the Mount Shasta. What should I hold now of it?

Ptaah

187. At the moment Henochs there lay the North Pole differently stored than this is today the case.

188. By cosmic influence and by an earth coup the North Pole at that time has shifted far to the west.

189. The North Pole-central point at that time is identical by today's Florida in America.

190. The Polgebiere at the moment Henochs were wondrous sceneries, occupied with palms and other tropical plant.

191. You would say, it was the paradise on earth, because it had the most favorable climate of your world.

192. It blossomed and matured there <to golden apples> which calls her simply oranges today.

193. In the timeless young nature of Hyperborea ruled uninterrupted summer, and the land derzeitlosen youth was also called.

194. The most delightful fruits nowhere prospered there, how differently on the earth.

195. The average annual temperature lay in the country of Hyperborea at 26.7 degrees of your measuring values and the coldest season never sank under the values of 21.9 degrees of your today's values.

196. You find similar relations still today in the former Hyperborea, so in Florida.

Billy This is fantastic, but you can say to me where exactly on the North Pole this Hyperborea lay? Ptaah 197. Precisely it lay exactly where today the land is still called <green land> and the real WnrHnnl Hpr Hamalicrpn 7pit nirht with horn hßitirron M/-"r"-li-"/-> I iz-Janticz-h ict 196. You find similar relations still today in the former Hyperborea, so in Florida.

Billy This is fantastic, but you can say to me where exactly on the North Pole this Hyperborea lay? Ptaah 197. Precisely it lay exactly where today the land is still called <green land> and the real North Pole of the past is not identical with the today's North Pole.

Billy Also Grönland, because my knowledge is called this in German meadowland.

Ptaah

198. This is in such a way.

199. There lay Tir nan Og.

Billy Was ist das ? Ptaah

200. Green land and land of the youth.

201. However, at that time it was today's Florida.

Billy Dann have been Herakles, Gilgamesh, Henoah, Jmmanuel, Amitabah, Methusalem and Noah and everything other there on top and not possibly in Florida?

Ptaah

202. In Hyperborea, in Florida when it still was here where today the land is called still meadowland.

203. But Jmmanuel was not there, because he was already in Florida where it is to be found today.

Billy Aha, of course, he lived only much later. But in connection with the Hyperboreern I still come on another question, namely on sagemwobene Agharta. Are you also oriented about this and can you do to me about that closer information?

Ptaah

204. You surprise me over and over again.

205. Why is the right name familiar to you?

38

Plejadisch-plejarische contact reports, conversations, block 2 206. Nevertheless, of my knowledge the earth humanity lives in the mistake with regard to the name of Agharta.

207. Nevertheless, in general it is called erroneously Agharti.

Billy Du forgets that I was a long time in India and in the Himalayas and also am on the blue people ge-stossen.

Ptaah

208. Therefore.

209. I should know this.

210. Unfortunately, I cannot give you in openness fatiguing information, because certain things must still remain furthermore confidential.

211. So much, nevertheless, may be explained that close to Shigatse and Shampulla the subterranean empire of Agharta is, the capital and the centre of distant descendants of extraterrestrial on the earth.

212. It is this the centre of the real secrets which rescue a huge power in themselves.

213. This city is controlled by the race of the solar sons.

214. Nevertheless, unfortunately, a trend towards the earthly world domination also rules with this race, exactly like with certain earthly religions and secret societies.

215. Any more I may not explain about that openly.

(Even as Ptaah his last words speaks, an Android approaches and says something in incomprehensible to me a language.) Ptaah

216. The missing ray ship was already discovered, we can continue now the trip.

217. Our next purpose should be the moon of the Third World.

218. With Semjase you can visit him and also take photos if you want to do this.

719 Danarh hpaoM-you in a \ ^ and----läästaa «

Ptaah

216. The missing ray ship was already discovered, we can continue now the trip.

217. Our next purpose should be the moon of the Third World.

218. With Semjase you can visit him and also take photos if you want to do this.

219. Then you proceed on that world which wants to allow to look they you.

(With Ptaahs Riesenraumer we glide in the space out, while Semjase and me drop us in the transport shaft and go in the hangar to her ship. Soon we glide from the sluice in the free space and whizz on the moon of the Third World to. An entertainment does not come about vorderhand any more and thus I completely devote myself to the events on the moon where the people of the future have already built her stations and live there. Semjase gives me only headword-like tips to different processes and constructions on the moon which I note as headwords to have of late descriptions for the pictures done by me. Several hours the flight lasts all over about the moon, then brings Semjase her ship again in the free space where I do two special statements.) Billy Semjase where is then Ptaah? I cannot see his Raumer.

Semjase

353. It is in the protection of his ray screens. Protected you mean Billy Gegen Sicht?

Semjase

354. Certainly, because we are foreign here, this is why I also had to bring around my ray ship the protective screen in action.

355. The people of this dimension and time have probably become more peaceful around a lot as in your world in your time, however, still they are barbarian and rather aggressive, thus they would force us to the landing what would be very undear to us.

Billy Aha, so they are actual, nevertheless, still as well as the earth people. However, do whizz then still with her primitive rockets around?

Plejadisch-plejarische contact reports, conversations, block 2 39

Semjase

356. Where you think there, nevertheless, they live here roughly 500 years in the future.

357. See once there in front, this is one of her ray ships.

Billy Strahlschiffe? Then girls, control the Knielche already the space journey. Semjase 358.

Certainly, they have also roughly 500 years more development behind themselves than the earth people of your time, I already, nevertheless, said this.

Billy Natürlich, yes, but - I is moved, look, nevertheless, sometimes...

Semjase

359. I do not understand you...

Billy Aber look, nevertheless - the ray ships which they have. I know that, nevertheless, from from

somewhere. I have already seen that. Moment, oh - you, they look deceiving similarly like the imagination things of spaceships which I have seen recently on television. Nevertheless, there the broadcasting of a future history with the name was Orion. The ship there in front looks similar to this television thing deceiving. Now, nevertheless, I think that I dream.

Semjase icht the case to the name Orion. The ship there in front looks similar to this television thing deceiving. Now, nevertheless, I think that I dream.

Semjase

360. However, this is not the case.

361. Think what I have explained to you before once that since certain earth people receive data and information, thus also author and the like persons from outside impulse-telepathic and to them unconsciously.

362. Thus they describe things and possibilities of the future and also make drawings and models.

363. Thereby they slowly prepare the earth people and in particular the scientists for the coming events, knowledge and forms and give them impulse for the development.

364. If you see, hence, now there outdoors the ray ship which corresponds to you so known form, then you can find for it also in my explanation the reason for it.

Billy Ich understands; the fact that I have not thought in it.

Semjase

365. It is only due really; let us now, however fly, to this world.

(Already few minutes later we are on the planet, only just in another dimension and about 500 years in the future. Semjase shows me many very interesting things which I take down again headword-like to be able to recognise the done photos later. The entertainment itself is even limited to headwords. When we again in the space hinausfliegen, I find out in my clock that we were seven hours in this world. Far in the space outdoors we push to Ptaahs gigantic ship, smuggle and then Ptaah leads his ship back in my time and in my dimension. There I remember in a little bit and direct, hence, a wish in Ptaah.) 40

It would be possible for Plejadisch-plejarische contact reports, conversations, block 2 Billy Ptaah, that you could bring me to the Venus because I want to do there once some photos? Also I would like to do once a little better admissions of our moon, thus, however, also from the Saturn and from the Jupiter. With the Jupiter the red spot would interest me especially once from which I would like to do a close-up.

Ptaah

220. I can correspond to your wish.

221. If you want to do pictures, nevertheless, on the Venus, you need with your camera a source of light.

222. I dispose of different Spezial-Kleinstrahlschiffe with strong sources of light.

223. I will let two this aircraft with you fly, thus you are able to do admissions by her light.

224. I can also correspond to the wish with regard to the moon as well as the Saturn and the Jupiter.

225. Concerning the close-ups of the Jupiter, however, you should try hard to protect very carefully these pictures, because earth scientists could attain from it, perhaps, knowledge which would not be yet well for them.

226. Also with regard to the pictures of myself I must ask you not to spread this and to show them exclusively only in your group.

You should make 227-th photos of it none and let it exclusively with slides bewenden which should remain in your own possession.

228. Originally this was not planned in such a way, however, now the possibility insists that I have to move on occasion with an oscillation device protected on the earth, thus one could recognise me what may not be allowed, however.

229. It was already a big exception that you might make photos from ascetic and Nera and we have found, by the way, in the meantime, in America female earth people who look similar to them deceiving and which co-operate interestingly likewise in Gemeinschaftlichkeit. by the way, in the meantime, in America female earth people have found who look similar to them deceiving and which co-operate interestingly likewise in Gemeinschaftlichkeit.

Billy Männeken, this is a pity. But the women, the doubles of ascetic and Nera where they are?

Ptaah 230. In the land America.

231. I already, however, said this.

Billy Kannst you to me her addresses give and call closer details about them? Ptaah 232. I would not want this for certain reasons. Billy Ihr are always so mysterious. Ptaah 233. In certain interests this must be.

(Ptaah cannot be softened and brings his ship very fast to the Venus where I can do some admissions really on the planet on the night side by the light help two of his special ships. Back with the earth moon I can do likewise different admissions and I also fly around with Semjase in her ship. Also with the film camera I do different admissions, thus also from an earth satellite. When we fly then again back to the moon, I ask Semjase for the Russian Lunachot, the years before on the moon herumroboterte. She explains Plejadisch-plejarische contact reports, conversations, block 2 41 that is possible for it to her to set in motion the Lunachot what I want of course immediately. Thus she flies to the vehicle and puts it really in movement by me inexplicable processes. Of course I also banish on the film. Then it goes again high in the space and there I see an UFO about the moon again flying which has already struck me with a former flight and that was christened by Hans Jacob <Nähmaschine>. Of course I also film this. When we fly then in Ptaahs ship to the Jupiter, I still film fast from the far here earth and the moon. With the Jupiter I change again in Semjases ship, then I do three admissions in large size of the red spot, while far Ptaahs in the background ship hangs in the space which I also banish on the film. Then Ptaah flies in the other nearness of the Saturn where I likewise still some admissions can do. Then his time is around, and he must say goodbye. In Semjases ray ship we fly back to the earth and she brings me immediately home and I am astonished at her cheek.) Billy Bist you then been moved?

Semjase

366. I have just controlled everything in the surroundings and it stirs nothing. Billy Aber we float directly about my house. Semjase 367. Also possible observers could not see us, my ship is abgeschirm Billy Aber we float directly about my house.

Semjase

367. Also possible observers could not see us, my ship is guarded. Billy This calms me, but you are cheeky, nevertheless.

Semjase

368. You should not surprise about that, I have appropriated with respect to that your kind.

369. And I think that it well starts.

Billy Du really has humor. Semjase 370. I said this earlier also from you, now, however, you must go, because at few minutes there awakes your woman.

371. See, I land there immediately beside the house, it is a good place.

372. On seeing again.

Billy Okay, okay, then just under it. Well, okay, this is clever. On seeing again, Semjase.

(I can be glided by the hatch and suddenly I do not see the ray ship any more. I push my hand upwards, and really, my hand simply disappears, however, I feel that she bumps into metal. The ship is there, even if I cannot see it any more. Thus I leave, and when I stand after only few metres on the street, I feel a light so-called. Quick I go again back with stretched out arm, nothing can however feel. There Semjases voice penetrates into me.) Semjase

373. I am already very high about you, see only.

(I high see in the sky. There a big and now fast smaller growing light moves very fast vertically in the sky to disappear directly.) 42 Plejadisch-plejarische of contact reports, conversations, block 2 Billy Ich the light has still seen.

Semjase

374. Certainly, however, now goes, because at seven minutes there awakes your woman.

375. Goodbye, dear friend.

Billy Mach's gut, Semjase and - many thanks.

The fortieth contact

Thursday, 18th December 1,975,14.29 o'clock of thought transmission contact Semjase

1. It is to me a very big need to maintain me with you, even if I hold you thereby from your work.

2. However, your state of the last days urges me to let come up to you my thoughts.

3. In particular therefore because I and father are involved in the fact very substantially that you

had to get through these things in yourself.

4. Everything is to me very much suffer, even if it had to be.

5. Father and I been able to estimate your position only when we been able to penetrate into you and recognised your emotions.

6. You were very sad and internally you wept bitter tears.

7. Thereby I feel pain in myself
